

b. Three estimates of the proportion ever evicted by age 15

Absolute lower bound

Estimate 1: 7.9 % (CI: 7.1–8.9 %)

Impute survey nonresponse

Multiple imputation

Estimate 2: 9.2 % (CI: 7.3–11.1 %)

Infer prevalence over years when no survey was conducted

Multilevel logistic regression

Model fit on five annual reports

15-year prevalence inferred from model parameters

Estimate 3: Overall 15-year prevalence = 14.8 % (CI: 12.6–17.2 %)
